MASTER'S PROGRAM

From Biomechanics to AI in ultrasound: 10 years in healthcare

Open Your Mind Seminar

Friday, Oct 11 2024
1.30 pm – 3.00 pm

Amphitheater BÉZIER
Arts et Métiers Institute of Technology
155 boulevard de l'Hôpital, 75013 Paris

What I wish I knew 10 years ago when starting in healthcare?

I embraced various clinical topics such as biomechanics, X-ray imaging, orthopedic surgical planning and now, AI software for obstetric ultrasound but also various structures: academia, mid-size company, start-up.

Reflecting on my career path, I realize choices made relied a lot on key encounters, not knowing much about jobs in the healthcare industry at that time.

While presenting my past experiences, I will share things I wish I knew when kicking off my PhD/1st job applications. I will also share what a day looks like in the life of a Clinical Project Manager including examples of collaborations with healthcare practitioners along with current challenges AI companies face in healthcare.

The healthcare industry offers various roles and various types of structure to grow in, let me share a few tips!
